EDUCATION

University of Glasgow (GU) | The Glasgow School of Art (GSA) September 2024
Master of Science in Medical Visualization and Human Anatomy, with Distinction

University of California, Irvine (UCI) June 2020
Bachelor of Arts, Minor in Biological Sciences
GPA: 3.7; UCI Campuswide Honors Collegium; Dean's Honor List (8 quarters)

SKILLS

Proficient with 3DS Max, Blender, ZBrush, Unity, Adobe Photoshop, Adobe Illustrator, Adobe Animate, Adobe Premiere
Experience with MITK, 3D Slicer, VR development, Autodesk Maya, Cinema4D, Rhinoceros 3D, 3D printing, Python, Unity C#, Adobe Creative Cloud
Conversational in Mandarin

EXPERIENCE

Joshua Medical Group April 2025 - Present
Lead Experience Designer
- Lead a multidisciplinary team producing large-scale audiovisual content for public exhibition
- Designed and helped build a ~5,000 sq. ft. immersive projection exhibition in ~6 months
- Architected a local network enabling fast, reliable content deployment across ~100 projectors

PNI Therapeutics January 2025 - June 2025
3D Artist Intern
- Collaborated with engineers to develop a therapeutic **VR** application tailored to cancer patients
- Defined art direction and produced mood and color boards with **Clip Studio Paint** to ensure visual impact
- Modeled, textured, and optimized high-quality 3D assets using **3DS Max** and **Blender** for real-time performance
- Solved complex technical and visual challenges to deliver a polished, intuitive user experience

Butt Talks TV June 2021 - July 2023
2D Animator and Editor
- Used **Adobe Illustrator, Animate,** and **Premiere** to deliver on-brand educational animated videos about gastrointestinal health on YouTube and TikTok
- Collaborated on video scripts with a medical professional to pare down complex topics for public education
- Analyzed **social media** trends to develop promotional strategies
- Developed a **Python** tool that connects to the ChatGPT API to aid with writing video scripts

Apples and Oranges Arts December 2020 - March 2021
2D/3D Artist
- Communicated with a multidisciplinary team to create a **VR** musical in collaboration with Discovery Cube
- Conceptualized initial moodboards and assisted with solidifying the ambience of the show
- Researched and developed textured 3D environment models such as buildings, furniture, and machines using **Clip Studio Paint** and **Blender**

PROJECTS

Student / Indie Video Games September 2016 - Present
Artist
- Produce characters, environments, props, animated sprites, and more in art styles such as pixel art and hand-drawn, with project time limits ranging from 48 hours to >2 years

Educational VR Application about Mitochondria July 2024 - September 2024
Solo developer
- Researched literature on mitochondrial biology to balance realism with playability using the **Meta XR SDK**
- Delivered the project within a strict 3 month deadline while rapidly learning new tools and production workflows
- Integrated **Adobe Creative Cloud**, **3DS Max**, **ZBrush**, **Unity C#**, **MITK**, and more into a finished product
- Publication in press: "MITOMOVER – Interactive Mitochondrial Dynamics in Virtual Reality", Springer Medical Visualization and Applications of Technology Book Series
